

PRESS RELEASE

Pokolm premiumtools and process knowledge for the US market

Chicago, September 9th, 2024

- Pokolm is now distributing premiumtools through its own Pokolm USA Customer Service Center in Fort Worth, Texas.
- Customers benefit from short delivery times and excellent application support
- Joint trade fair appearance with technology partner Starrag at the IMTS in Chicago

Pokolm premiumtools have also been easily accessible to the American metalworking market since the beginning of 2024. The German-based company markets its innovative indexable insert milling cutters and other cutting tools via its own Pokolm USA Customer Service Center in Fort Worth, Texas. Pokolm will be presenting highlights from its product range together with its technology partner Starrag at IMTS in Chicago.

USA important focus market for Pokolm premiumtools

With tool systems and application consulting for the machining of complex 2.5 and 3D geometries, Pokolm has grown into a globally active company in recent years. During the internationalization process, Pokolm defined the USA as an important focus market. **Ulrich Wiehagen, Managing Director of Pokolm**, explains: "Our company is not only characterized by our broad product range of innovative indexable insert milling cutters and other cutting tools - we also want to "think in solutions" for the American market and guarantee excellent application advice. A local customer service center was the next logical step for us. Together with our customers, we always find suitable solutions that shorten production times and increase productivity."

The intelligent Pokolm tool system offers the optimum milling cutter for every requirement. Spinworx®, Mirroworx®, Slotworx® or Fourworx® are available in various designs, qualities and coatings, from the holder to the indexable inserts to the accessories. A large number of these tools are also available in imperial sizes. The milling tools in the process chain are complemented by Gravfix, a pneumatic needle marker for precise and versatile markings, and Forgefix, the pneumatic cold forging tool for the precise mechanical treatment of surfaces.

Pokolm at IMTS 2024 in Chicago

From September 9 to 14, 2024, visitors to IMTS in Chicago will have the opportunity to talk to Pokolm about innovative tools for a wide variety of materials at the Starrag booth (booth #338556, south building level 3). You will find Pokolm there together with its long-standing technology partner Starrag, the world's leading manufacturer of precision machine tools. Pokolm is proud to be represented at this trade fair as a partner of Starrag.

About Pokolm

Pokolm Frästechnik GmbH & Co. KG, based in North Rhine-Westphalia, has been producing innovative and durable milling tools for 30 years. With a tradition of taking on the most complicated geometries and the most demanding materials, Pokolm has grown into a globally active, medium-sized company in recent years.
